**REPLY TO NOTIFICATION OF DEFECTIVE RESPONSE**

Sir:

In response to the Notification of Defective Response mailed May 18, 2006, a copy of which is attached, Applicant replies that there was no defect in the response. Rather, there was a defect in the records of the U.S. Patent and Trademark Office with regard to the international patent application from which the present U.S. application was filed pursuant to 35 U.S.C. 371.

The international application, PCT/JP2004/011256, was filed August 5, 2004 in the Japanese Patent Office as the Receiving Office. The international application identified two persons as the inventors. The international application was published, likewise identifying both persons as inventors.

However, during the international stage of the international patent application, the inventorship was corrected by removing the second person as a designated inventor for this patent application. The proper papers, copies of which are not available to the undersigned, were filed with WIPO to effect this correction. Upon the acceptance of this inventorship correction, a Notification of The Recording of a Change with respect to the international application was mailed by WIPO on November 4, 2005, to the Receiving Office and the designated Offices, which includes the U.S. Patent and Trademark Office. A copy of that

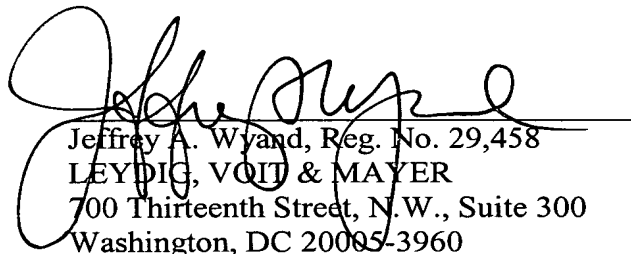

notification is attached. Also attached is the latest bibliographic data for the international patent application obtained from WIPO. These documents confirm that, in the international phase of the international patent application, one of the persons designated originally as an inventor has been deleted and that only a single inventor remains.

It was assumed, based upon the indication on the Form PCT/IB/306 mailed November 4, 2005, that the notification would have been received and recorded in the records of the United States Patent and Trademark Office, as a designated Office in advance of the lodging of the present U.S. patent application on December 28, 2005.

At the time of filing of the present U.S. patent application, only a single inventor was identified in the application data sheet filed with the patent application. Further, when the response to the notification of missing requirements was filed, the Declaration supplied correctly identified only one person as the inventor for this patent application. That identification and the declaration were completely in accordance with the international application at the time of the filing of the present U.S. patent application and at the time of the filing of the response to the Notification of Missing Requirements.

Accordingly, the Response filed April 18, 2006 was entirely correct and the Notification of Defective Response mailed May 18, 2006 was incorrect. Formal written notification that the response filed April 18, 2006 was correct and complete is respectfully requested.

Respectfully submitted,
